No Republican will ever win another election if things stay as they are now.

Democrats have discovered the perfect way to "win" every election from now on.

They don't need to pack the Supreme Court.

They don't need to make Puerto Rico and DC states.

They don't need to open the southern border.

They don't even need Antifa and Black Lives Matter in the street.

All they have to do is what they are doing right this minute: Continue with massive mail-in voting. Then make it permanent.

Send ballots to everybody even if they didn't request one, so whoever gets it can vote, regardless of whether they are the registered voter.

Never allow voter rolls to be cleaned up so dead people, and people who have moved, can keep voting.

Get rid of the signature-match and postmark requirements so you can submit as many ballots as you need.

Enable counting for days after election day so you can add votes where necessary, and do not, under any circumstances, let the other party observe anything even though they have a legal right to do so.

There is strong direct evidence documented by hundreds of affidavits and overwhelming circumstantial evidence that voter fraud is occurring. If Democrats were not cheating in places like Philadelphia and Detroit, they would want the other party to observe.

Instead, they cover up windows in counting places and ignore the law and court orders that require them to allow Republicans to observe the counting.

It only takes a few corrupt places to win an election through vote fraud. Philly, Detroit, Atlanta, Milwaukee. There's four right there. Philadelphia is renowned for it's election fraud.

There is no doubt that massive election fraud has taken place and it has been coordinated. These

The Massive Election Fraud of 2020 Can Not Stand

are the same ruthless, corrupt people who gave us two coups d'etat that resulted in the Russia Hoax that President Trump had to deal with for three years, and a political impeachment based on a perfect phone call about Biden's influence peddling, which we now know was true thanks to Hunter Biden's laptop.

Think about how compromised Joe Biden is in dealing with China, thanks to his and Hunter's influence peddling, and Iran, with the nuclear deal in which Joe Biden and Obama guaranteed the world's largest exporter of terrorism a nuclear bomb and billions of dollars in cash to spread their terrorism all over the world.

Attorney General Barr should appoint a special counsel right now to look into Biden's well-documented influence peddling. Investigations are underway but this requires a special council like Mueller with an unlimited budget.

However, one won't be appointed because Republicans never play to win the way Democrats do. That's why Durham didn't announce anything, before the election, about his investigation of the first coup d'etat; and now, he will be shut down.

Obama and Biden, with their blessings, gave ISIS a caliphate.

Trump destroyed all that, but it will now be revived.

Think about Brett Kavanaugh's confirmation and Diane Feinstein holding Blasey Ford's false accusations until just before the vote, which is a popular Democrat technique. These people are the sleaziest but they play to win, and usually do, like now.

Feinstein's husband, Richard C. Blum, is a part owner of the voting machine company, Dominion Voting Systems, used widely across the country and in all the battleground states. It was developed with money from the Clinton Global Initiative. James Howard Kunstler observes:

Then there are the janky numbers in all those other states where the Dominion vote tabulation software was used: 130,000 here... 27,000 there... et cetera. By the way, the company that puts out this Dominion product is partly owned by Democratic Senator Dianne Feinstein's husband, Richard C. Blum; one of its top executives is Nancy Pelosi's former chief-of-staff; and the software's development was funded by the Clinton Global Initiative in 2014. I guess they know a good thing when it jumps up and bites them on the lips.¹

Software glitches in systems using Dominion Voting Systems software shifted thousands of votes from Trump to Biden in Georgia and Pennsylvania. In Georgia, software updates were done the

The errors were supposedly corrected but how many hundreds of other places around the country did not catch them and correct them? There should be a full scale investigation of voting machine fraud and specifically Dominion Voting Systems, which starts out suspect due to its ties to Diane Feinstein, Pelosi, and the Clinton Global Initiative.

Kunstler also notes the method used by the CIA to interfere in elections of other countries. He writes:

I supposed you've also seen rumors about the Intelligence Community's election-meddling software programs, HAMR ("Hammer") and Scorecard allegedly being employed in last week's election, but that is only a rumor so far. Sidney Powell, lawyer to General Michael Flynn, dropped it on the airwaves, and recall that General Flynn was the Director of the DIA (Defense Intelligence Agency), so there's a chance that he knows about these programs in excruciating detail. There's also reason to believe that General Flynn retains connections to many loyal intel techies who worked under him, and are capable of sussing out the situation. Also, by the way: do you suppose that any of this election-medding software was used to ensure Joe Biden's mysterious out-of-nowhere victory in the Super-Tuesday primary? Hmmm. . . .? ²

Trump was on a fast track to reelection with a booming economy and foreign policy wins all over the world.

Then COVID-19 hit and gave Democrats their chance with mail-in ballot fraud, which enabled them to manufacture thousands of ballots, whatever they needed.

They knew they had one chance to negate everything Trump has done to Make America Great Again and they were not going to lose it. They were going for it, like they did with Obama's corruption of the FBI and CIA, the spying on Trump's campaign, the Russia Hoax and three-year Mueller investigation.

Now, if this election stands, there is no limit on Democrat deep state corruption and power.

The worst thing is the end of all the investigations such as John Durham's, so now Democrats and a corrupt FBI will get clean away with a coup d'etat to spy on and remove a duly elected American president.

There's a good chance Eric Holder will be back in charge of the Justice Department and he will take care of Jim Comey and his other Democrat allies.

The Massive Election Fraud of 2020 Can Not Stand

Donald Trump Jr. has been encouraging his father to declassify everything related to the ongoing investigations to get it all out there, and that definitely should be done.

Another horrible thing for America is that Big Tech - Google, Facebook, Twitter, et al. - will get away completely with destroying free speech for half the country. We will now be 100% under Big Tech's control. Everything we say or think now has to be approved by Google, Facebook and Twitter, and that will get worse.

With their monopoly power they are more like public utilities who should not be allowed to censor and discriminate against anybody but they do brazenly. Imagine other public utilities discriminating against citizens. What if the power company decided to cut off your power because you are a MAGA supporter to teach you a lesson and make an example out of you to scare others.

No public utility should be able to discriminate like Google, Facebook, Twitter, et al. discriminate.

Big Tech and the corrupt mainstream news media have total control of America now.

If Republicans are truly out of power, then there will be no way to break up those monopolies and restore our freedom of speech and thought.

Think about Twitter censoring the president of the United States who was tweeting the legitimate *New York Post* story of Tony Bobulinski's credible testimony against Hunter and Joe Biden in order to defend his personal honor.

Republicans let us down like they always do.

That is the refreshing thing about President Trump. He fights, and fights hard, and wants to pay back people who wrong him. There is something so honest and gratifying about that.

Republicans like Mitt Romney, a/k/a Pierre Dilecto, never fight hard. They are the first to buckle because they want to be liked by the corrupt news media, but President Trump called out the media over and over. That's why they hate him. That, and the fact that he has been effective in spite of their constant attempts to destroy him.

President Trump is not the enemy of democracy but the mainstream news media is. They and Big Tech hide information Americans need because it helps the Democrat Party, information like the Bobulinski interview of October 22, 2020 shown at <https://www.c-span.org/video/?477307-1/tony-bobulinski-statement-hunter-biden>³ and Hunter Biden's laptop reports from the *New York Post*, which show clearly Joe Biden's illegal influence peddling, and the money he and Hunter made with the Chinese Communists, the Ukrainians, and others.

Sidney Powell, former federal prosecutor and current lawyer for Lt. Gen. Michael Flynn, said on

The Massive Election Fraud of 2020 Can Not Stand

Nov. 8th that top Democrats are using the aforementioned Dominion Voting Systems to commit election fraud:

They have invested in it for their own reasons and are using it to commit this fraud to steal votes. I think they've even stolen them from other Democrats in their own party who should be outraged about this also.⁴

She said Dominion has about a third of the voting machine market with customers in 28 states and Puerto Rico "including all of the battleground states."

In a Fox News interview with Maria Bartiromo Sunday, November 8, Powell said:

There has been a massive and coordinated effort to steal this election from We The People of the United States of America to delegitimize and destroy votes for Donald Trump. To manufacture votes for Joe Biden. They've done it in every way imaginable, from having dead people vote in record numbers, to absolutely fraudulently creating ballots that exist only for voting for Biden.

She goes on:

We've identified over 450,000 ballots that miraculously only have a vote for Joe Biden on them and no other candidate. If you look at Florida where things were done right you can see that that is how the rest of the country should have gone. But they also used an algorithm to calculate the number of votes they would need to flip. And they used computers to flip those votes from Trump to Biden and from other Republican candidates to their competitors also.⁵

Here's the Sidney Powell

video: <https://www.thegatewaypundit.com/2020/11/sidney-powell-tons-evidence-hundreds-thousands-ballots-going-discarded-video/>.

Statistical analysis shows that Biden votes far exceed Democrat down-ticket votes making those votes statistically improbable.

Republicans won 28 or 29 of the most competitive US House seats. Republicans did not lose one single House seat! The Republicans also took control of three more state [legislatures]."⁶

The mathematical evidence of voter fraud is overwhelming. It is convincingly laid out in an article with information from MIL-OPS, "a Defense Department site approved for discussion among military officers and military retirees with appropriate military specialities." It goes into great detail with charts and graphs and explanations of things like Benford's Law.

The article title is "Overall Multi-State Data: Mathematical Evidence"⁷ and it was posted by Pamela Geller November 8, 2020, and notes from The Gateway Pundit, "Voter Fraud in Wisconsin - Massive Dump of Over 100,000 Ballots for Biden All the Sudden Appear Overnight."

It also states under heading Mathematical Evidence, subheading Statistical Impossibilities in Wisconsin and Michigan, November 5, 2020:

In both Michigan and Wisconsin, several vote dumps occurred at approximately 4am on Wednesday morning, which showed that Joe Biden received almost 100 percent of the votes. President Trump was leading by hundreds of thousands of votes in both states as America went to sleep, and turnout in the state of Wisconsin seems to be particularly impossible.

The usual explanation of the corrupt media is that most of the mail-in ballots came from Biden supporters but that can not be true:

This is particularly concerning considering Republicans led in mail-in ballots requested and mail-in and in-person ballots returned leading up to and at the start of election day.

According to NBC News on election day before the polls opened, in Michigan, Republicans led 41% to 39% in Mail-in Ballots requested. Republicans also led 42% to 39% with Mail-in and in-person ballots returned.

In Wisconsin on election day before the polls opened, Republicans led Mail-in Ballots requested 43% to 35%, and Mail-in and early in-person ballots returned 43% to 35%. Almost ALL of the ballots found, while most in the country were sleeping, after the officials stated they would stop counting, were for Joe Biden.

The Massive Election Fraud of 2020 Can Not Stand

Under sub heading, Former Politicians of Blue Cities Chime In, Rod Blagojevich, former corrupt governor of Illinois who was sentenced to 14 years in prison but pardoned by President Trump By Gene Kizer, Jr., Charleston Athenaeum Press
Hits: 520
Detroit and other cities:

In big cities where they control the political apparatus and they control the apparatus that counts the votes, and they control the polling places and the ones who count the votes, it's widespread and it's deep . . .

In "How They Stole the Election" by Vasko Kohlmayer, November 9, 2020, he writes:

It was a combination of vote harvesting and fraud that Biden has come out on top. In some areas of Wisconsin, turnout for Biden was nearly 90 percent. One analyst pointed out that this is 5.5 standard deviations above the average. Such a thing is not practically possible given that the odds against it are 1 in 52,910,052. It is like flipping a coin and getting heads twenty-five times in a row.⁸

It is now obvious that the presidential election of 2020 has been stolen by massive fraud and corruption by the same people who have given us two coups d'etat in the past four years, and it can not stand.

A Republican fundraiser, Bill White, has put together a reward of \$1 million dollars "for evidence of voter fraud." He has already raised over \$14 million dollars:

White is based in Atlanta, where the Trump campaign has dispatched dozens of lawyers for a narrowly contested vote count led by Republican Rep. Doug Collins. He said Atlanta's Trump campaign and GOP headquarters have received 'literally hundreds of calls' reporting fraud since the election.⁹

Texas Lt. Gov. Dan Patrick also "will pay up to \$1 million 'to incentivize, encourage and reward people to come forward and report voter fraud.'"¹⁰

People who have evidence that leads to an arrest and conviction will get a guaranteed payout of \$25,000.¹¹

To report election fraud, call President Trump's hotline at (888) 503-3526 or go online and report it at:

https://defendyourballot.formstack.com/forms/voter_fraud?utm_source=graphic

We have to have faith in the integrity of our elections or we don't have a country.

These charges have to be thoroughly investigated.

The only thing that will satisfy me is a manual vote count in Philadelphia, Detroit, Milwaukee, Atlanta and other places where fraud is highly suspected.

Republicans and Democrats together need to look at EVERY SINGLE BALLOT that was cast, and count only clearly legitimate ballots.

If that is done, and President Trump loses, I will accept that we lost a fair fight and I will continue to have faith in our wonderful country.

But if fraud is proven, then people need to go to jail jail jail. Something on the scope of what is obviously happening now is so destabilizing for our country that it should be considered treasonous and people be executed for it. That should be the law.

This kind of corruption can not stand. The gauntlet is down. The good guys have to win this fight because who the hell wants to live in a banana republic where your elections can be stolen by the lowest scum of society.

It angers me greatly that they have done this to our magnificent country.

Failure to root out this fraud and hold people accountable is not an option.
